BC-1863X

This is a "Must Have" for all the T4 Xray drivers that are looking for the maximum performance, starting from the details. The "BR1863X" inherits the same development of the "BR1863" but thanks to its case, that is designed specifically for the T4 Xray, allows to fix it directly to the chassis without being forced to use the mount and consequently lowering the center of gravity.

Extreme LCG (Low Center Gravity)

Low Profile - Brushless Steel Gear - High Speed -
Edge technology super Big 12 Bit - Aluminium
canter case - Shorter Heavy duty wire (5cm) -
Fast response - Incredible torque Increased transit
speed - Increased efficiency - Water resistant with 4
silicon seals implanted - Strong and precise-made
steel gears

Developed for Xray T4 Only (Late 2017 Version)
Sanwa **SSR** mode acceptable - Output Shaft: 25T
Spline (Futaba)
